

“By growing our own low-carbon fuels, we become more energy independent and put money into the pockets of Wisconsin’s hard-working farmers.”

Jamie Derr
Marshall, Wis.
Derr Solarmass, LLC

Jamie is just one of many farmers across the state who support the Low Carbon Fuel Standard in the Clean Energy Jobs Act. Each year, Wisconsin spends \$16 billion importing dirty fossil fuels. Transitioning toward homegrown fuels like corn and switchgrass will help keep that money here in our state.
